FUEL STABILIZER

Special overwinter formula

Wynn's Fuel Stabilizer is an additive for petrol/LPG engines to preserve the fuel when the engine is put out of service during a long time or when the fuel has to remain in the tank during a long time.

Properties

- ✓ Prevents the degradation of petrol and facilitates engine starting after periods of extended shut down.
- ✓ Preserves and stabilises the fuel.
- ✓ Protects the fuel system against rust and corrosion.
- ✓ Prevents the formation of deposits in the fuel tank and filter.
- ✓ Forms a protective lubricating coating on the valves and valve seats.

Applications

- ✓ For all two and four-stroke petrol engines, hybrid and LPG engines. Recommended for: car engines, scooters, motorbikes, boats, outboards, jet skis, generators, pumps, plant, agricultural, rescue and emergency equipment, etc.
- ✓ Also specially recommended for classic cars.

Directions

- ✓ One bottle (250 ml) treats 250 litres of petrol.
- ✓ Add 5 ml per 5 litres of petrol (suitable for all unleaded petrol and bio fuel to E10).
- ✓ Protects fuel for up to 12 months of non-use.
- ✓ For optimal results add Wynn's Fuel Stabilizer and let the engine run at idle for 10 minutes before overwintering.
